

City of Bradford Metropolitan District Council – Use of AI Statement

Regulation 19 Local Plan and Supporting Documents

- 1.1 This summary statement sets out how the City of Bradford Metropolitan District Council ‘the Council’ has applied the use of artificial intelligence (AI) to the content of the local plan and / or supporting documentation.

The Use of AI

- 1.2 The use of AI has been used to support the drafting of supporting documents as set out below in **Table 1**.

Table 1: Use of AI

Supporting Document	Extent of Use
Local Plan Executive Summary	An AI summarised version of the plan was used alongside other material to support the identification of key summarised issues and substantial themes.

Which tool you used

- 1.3 For the Local Executive Summary ChatGPT was used to summarise the Local Plan. The source of material was from a publically available issued copy of the Local Plan.

What it was used for and how it was used

- 1.4 This was then used as one of a number of sources to draft the Local Plan Executive Summary document and was then further edited.

What checks have been made

- 1.5 Multiple edits and review of factual points.

Accuracy of the content

- 1.6 The content of the final published Executive Summary document is considered accurate.

Future Use of AI

- 1.7 The Council is intending to use embedded AI features within its chosen consultation portal and in the future processing of representations utilising different software. The following notification is included on the Council’s website:

‘By using this service, you acknowledge and agree that artificial intelligence (AI) technologies may be used to process any data you submit’.
